Seamless Wi-Fi for Education: eduroam

eduroam (education roaming) allows students, faculty, staff, administrators, and researchers at K–12 schools, colleges, libraries and museums to access secure Wi-Fi connections using their **home institution credentials** at any other eduroam institutions. If your home organization is an eduroam participant, safe roaming is as simple as opening your computing device and connecting to eduroam!

Benefits of eduroam

eduroam allows institutions to securely extend their Wi-Fi networks, enabling easy access for students, faculty, and visitors alike, streamlining connectivity across organizations for better educational experiences and collaboration. Whether a student is completing dual enrollment credits at a nearby community college, or a faculty member is working on CE at a neighboring institution, connection is easy!

38,000 locations worldwide

2,500 locations in the United States

Reach out today to learn how you can implement eduroam in your organization and enhance connectivity.

How it works:

eduroam provides users with authenticated network logon and access to the internet through a single wifi profile and set of credentials, anywhere the service has been made available by participating organizations. Connection can be seamless and automatic. Participating organizations connect to the national operating systems and overlay eduroam network services, which adhere to comprehensive technical standards.

LINK OREGON

Link Oregon is your designated eduroam support organization – we're here to help!
