**SPONSORED LIGHTNING TALK**

**Modernizing Identity Security**

**PALO ALTO NETWORKS**

Speaker:

Anton Cauduro, Sr. Director of Modern Privileged Access Management

# Palo Alto Networks

Lightning Talk – *Modernizing Identity Security*

Silos Create Gaps

Identity is the

#1

Attack Vector Today

---

# Privileges, Identities, and Risk Are Growing Exponentially

HUMANS

96%

Identities with access beyond what is required for their role

Uncontrolled privilege

MACHINES

109:1

Machines vastly outnumber humans

Hidden access to the highest risk systems & data

AGENTS

99%

Of companies have adopted AI agents

AI adoption is outpacing controls

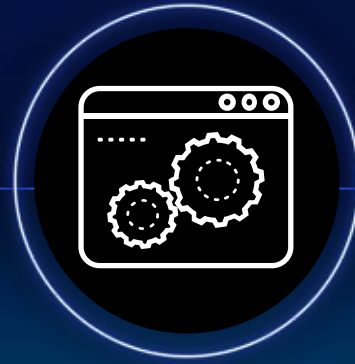

Identity weaknesses played a material role in almost 90% of Unit 42 investigations over past year

---

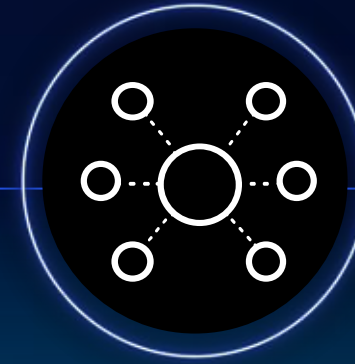

The environment changed. Risk followed.

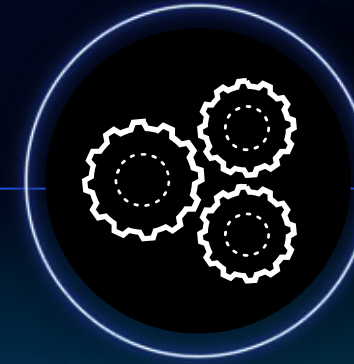

**Infrastructure**  
became  
ephemeral

**Software**  
became the  
business

**Ecosystem**  
replaced  
perimeters

**Actions**  
became  
automated

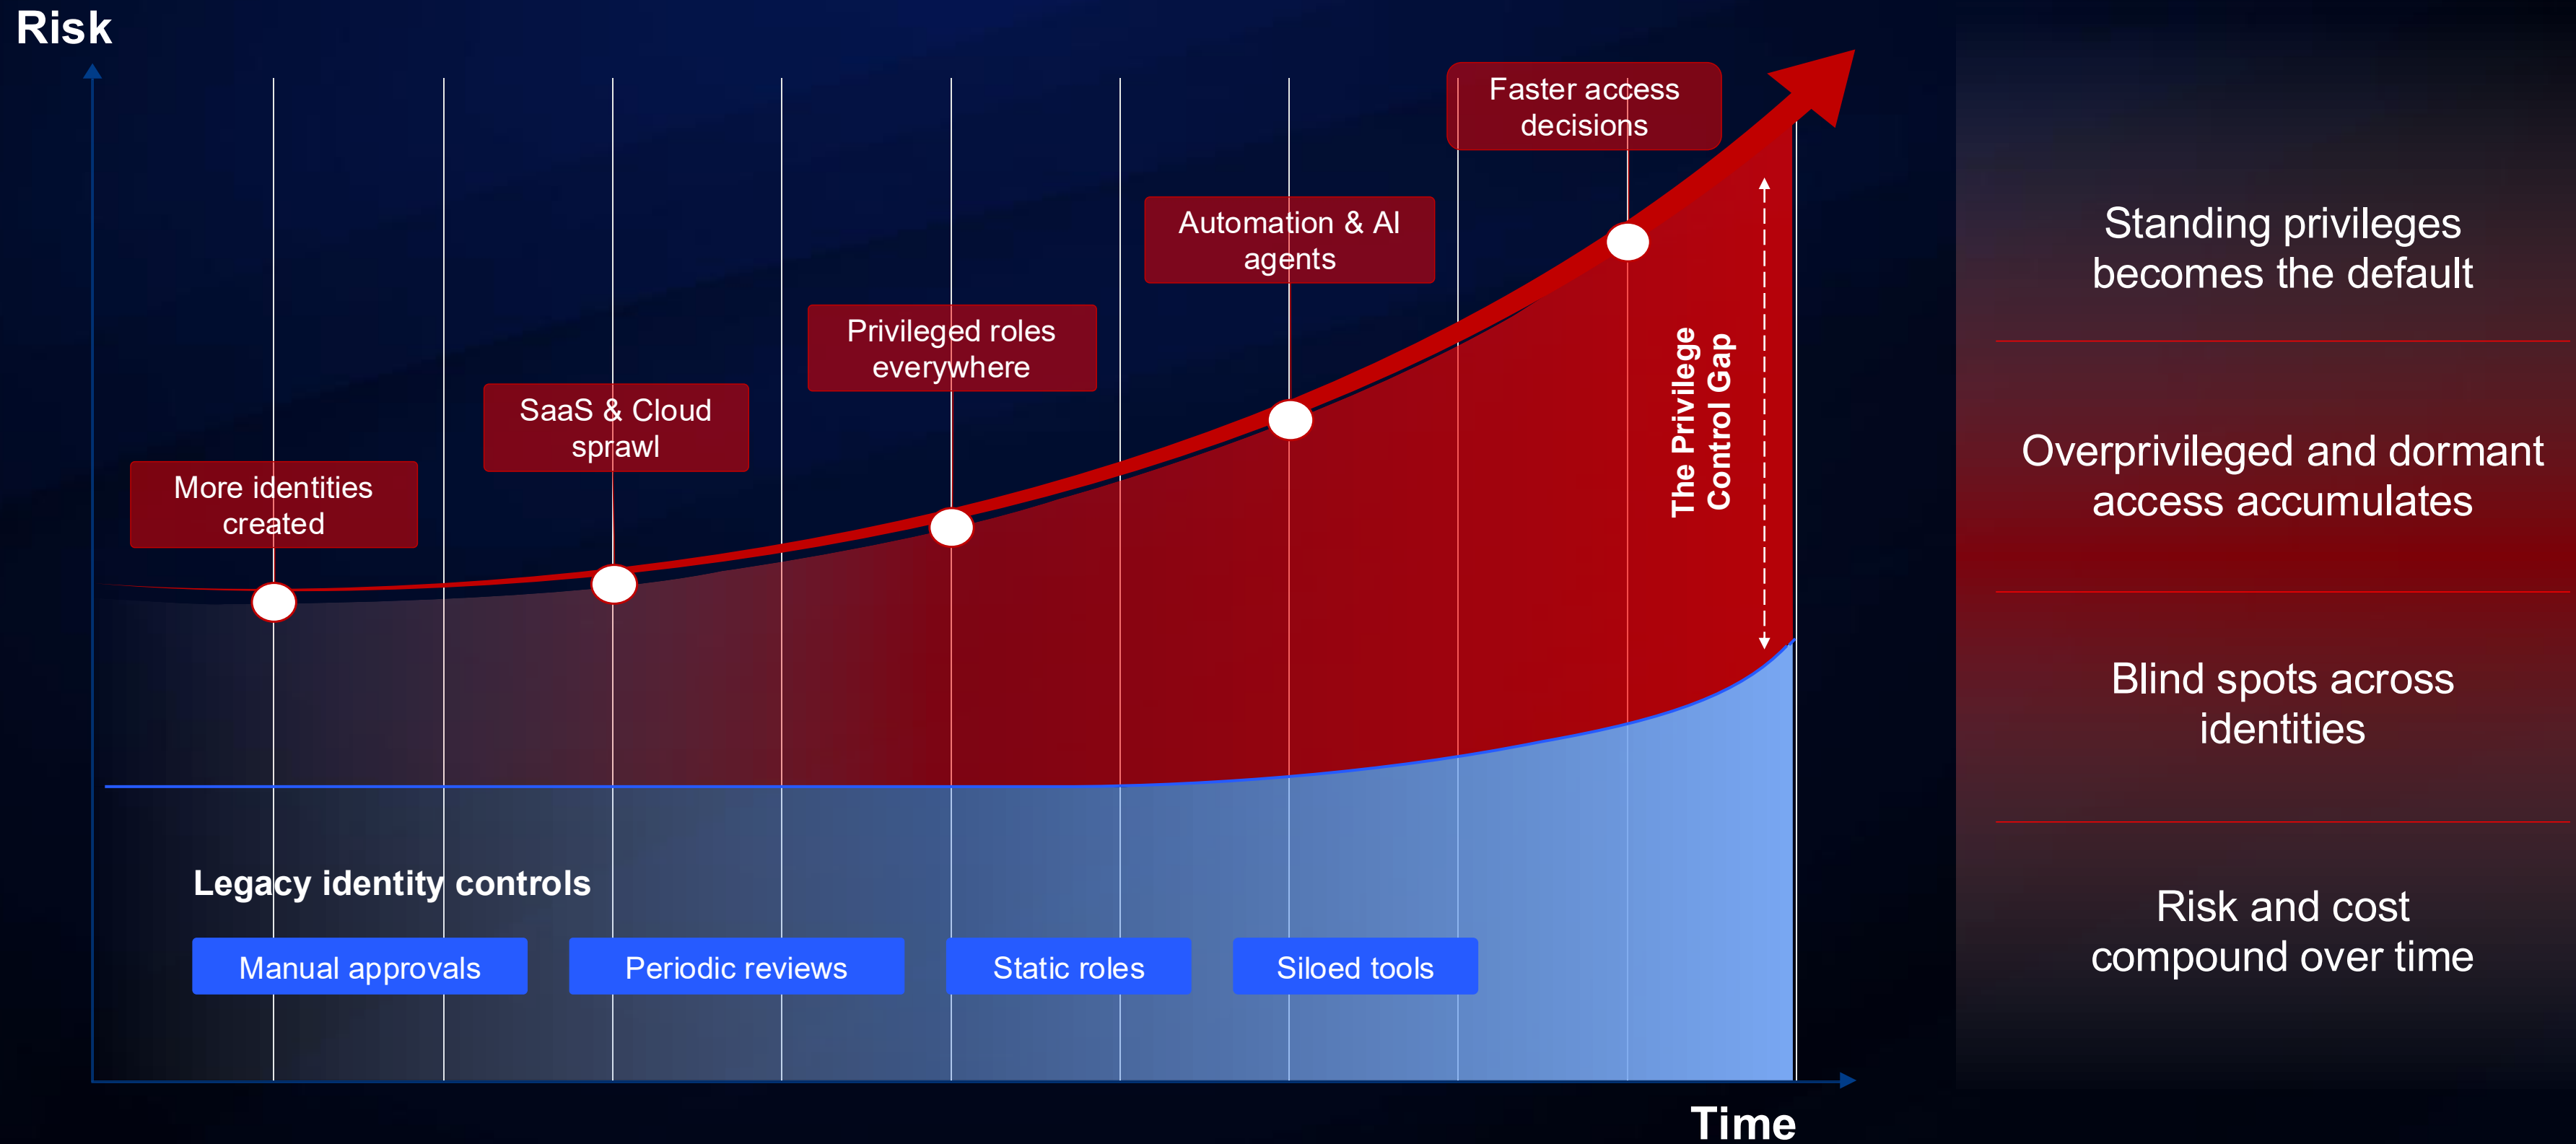

To keep up, access expanded.  
**Privilege became normal and embedded.**

# State of Today's Fragmented Market

**Each individual silo is ineffective at securing identities**

# Your legacy identity program can't keep up

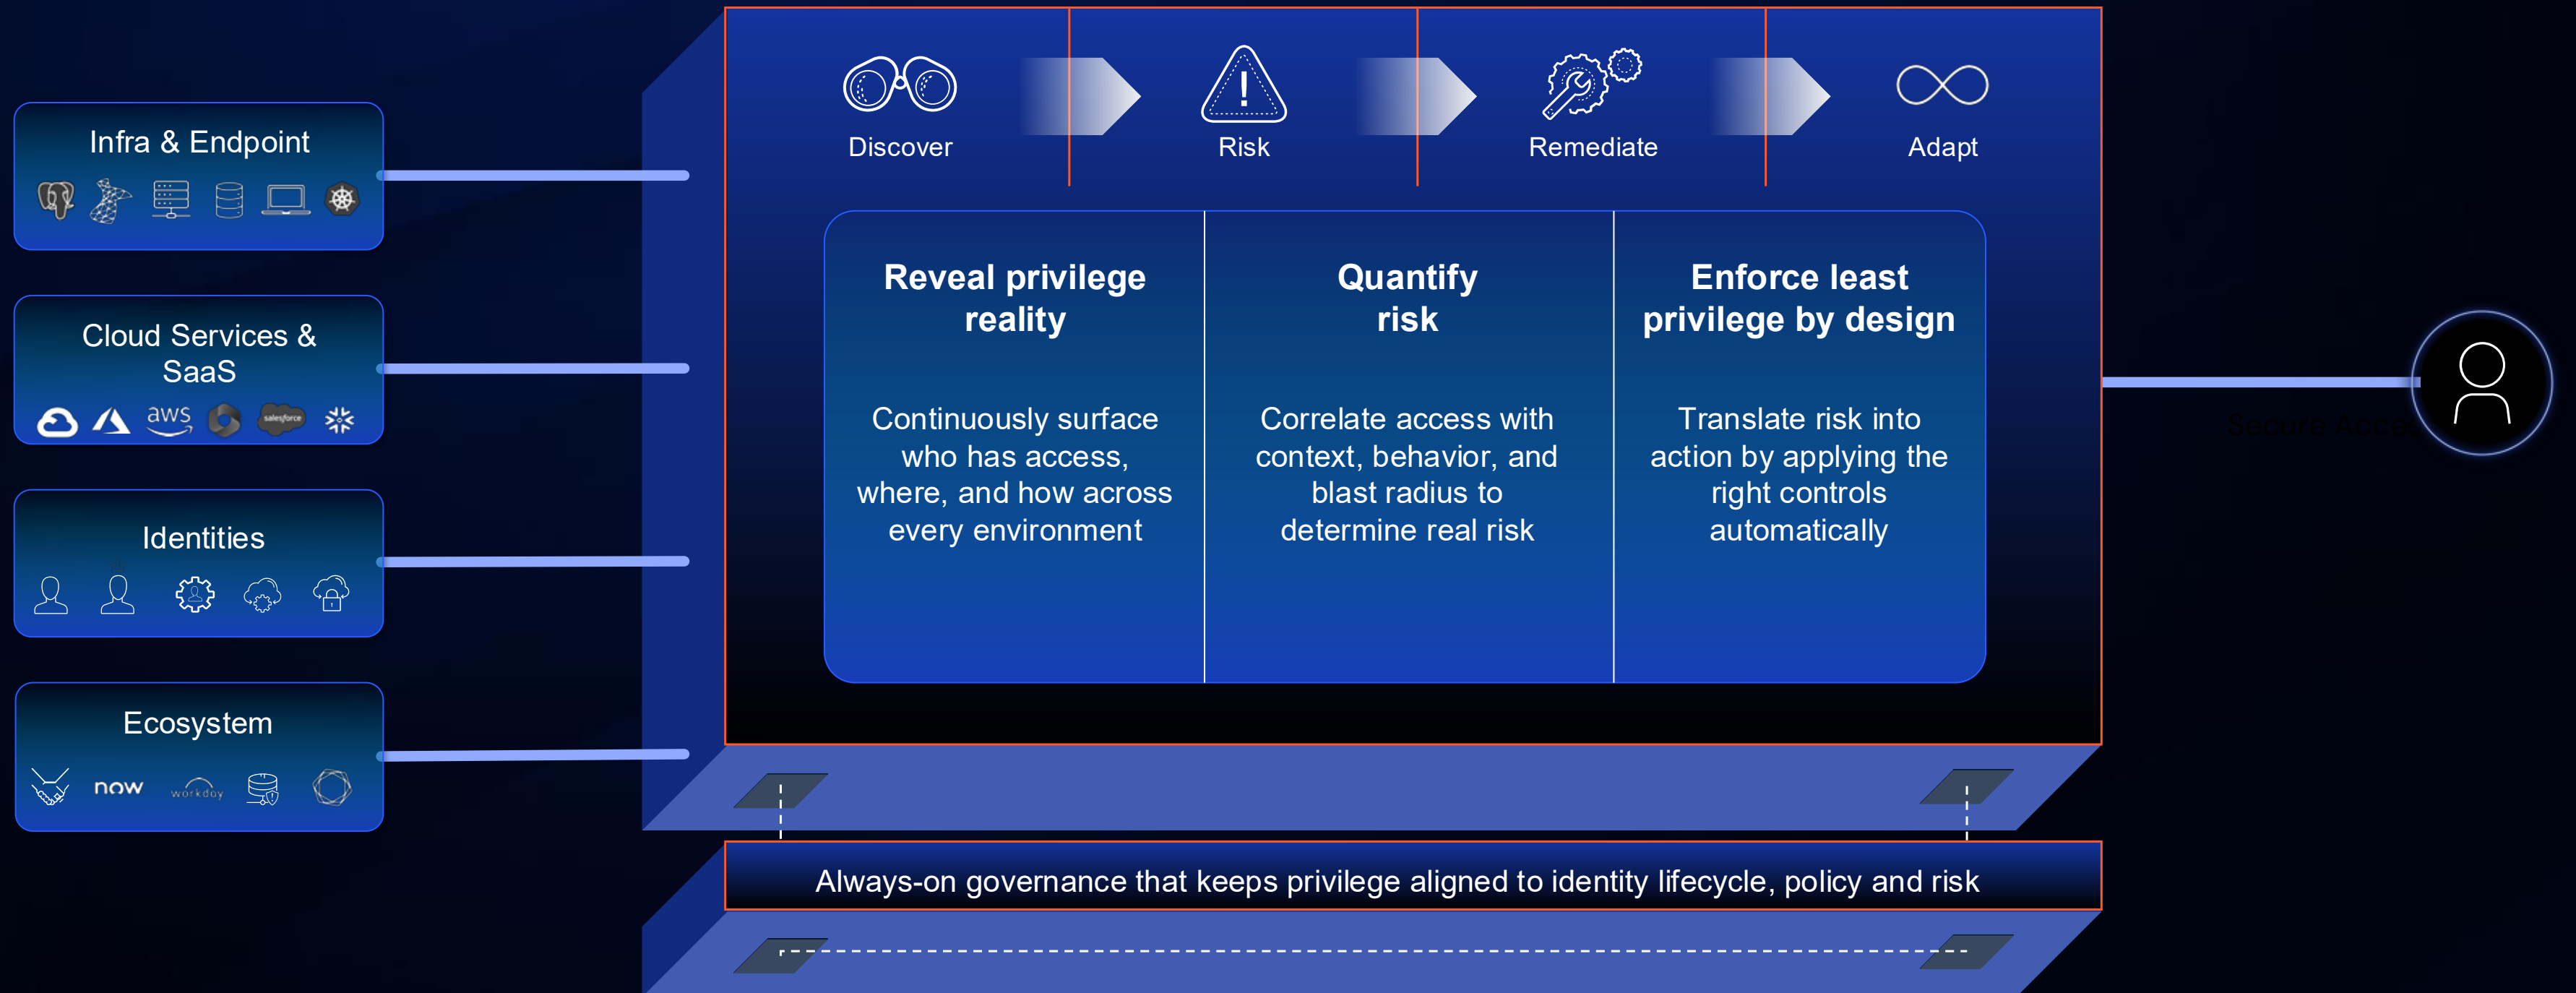

---

# Identity Control Gap

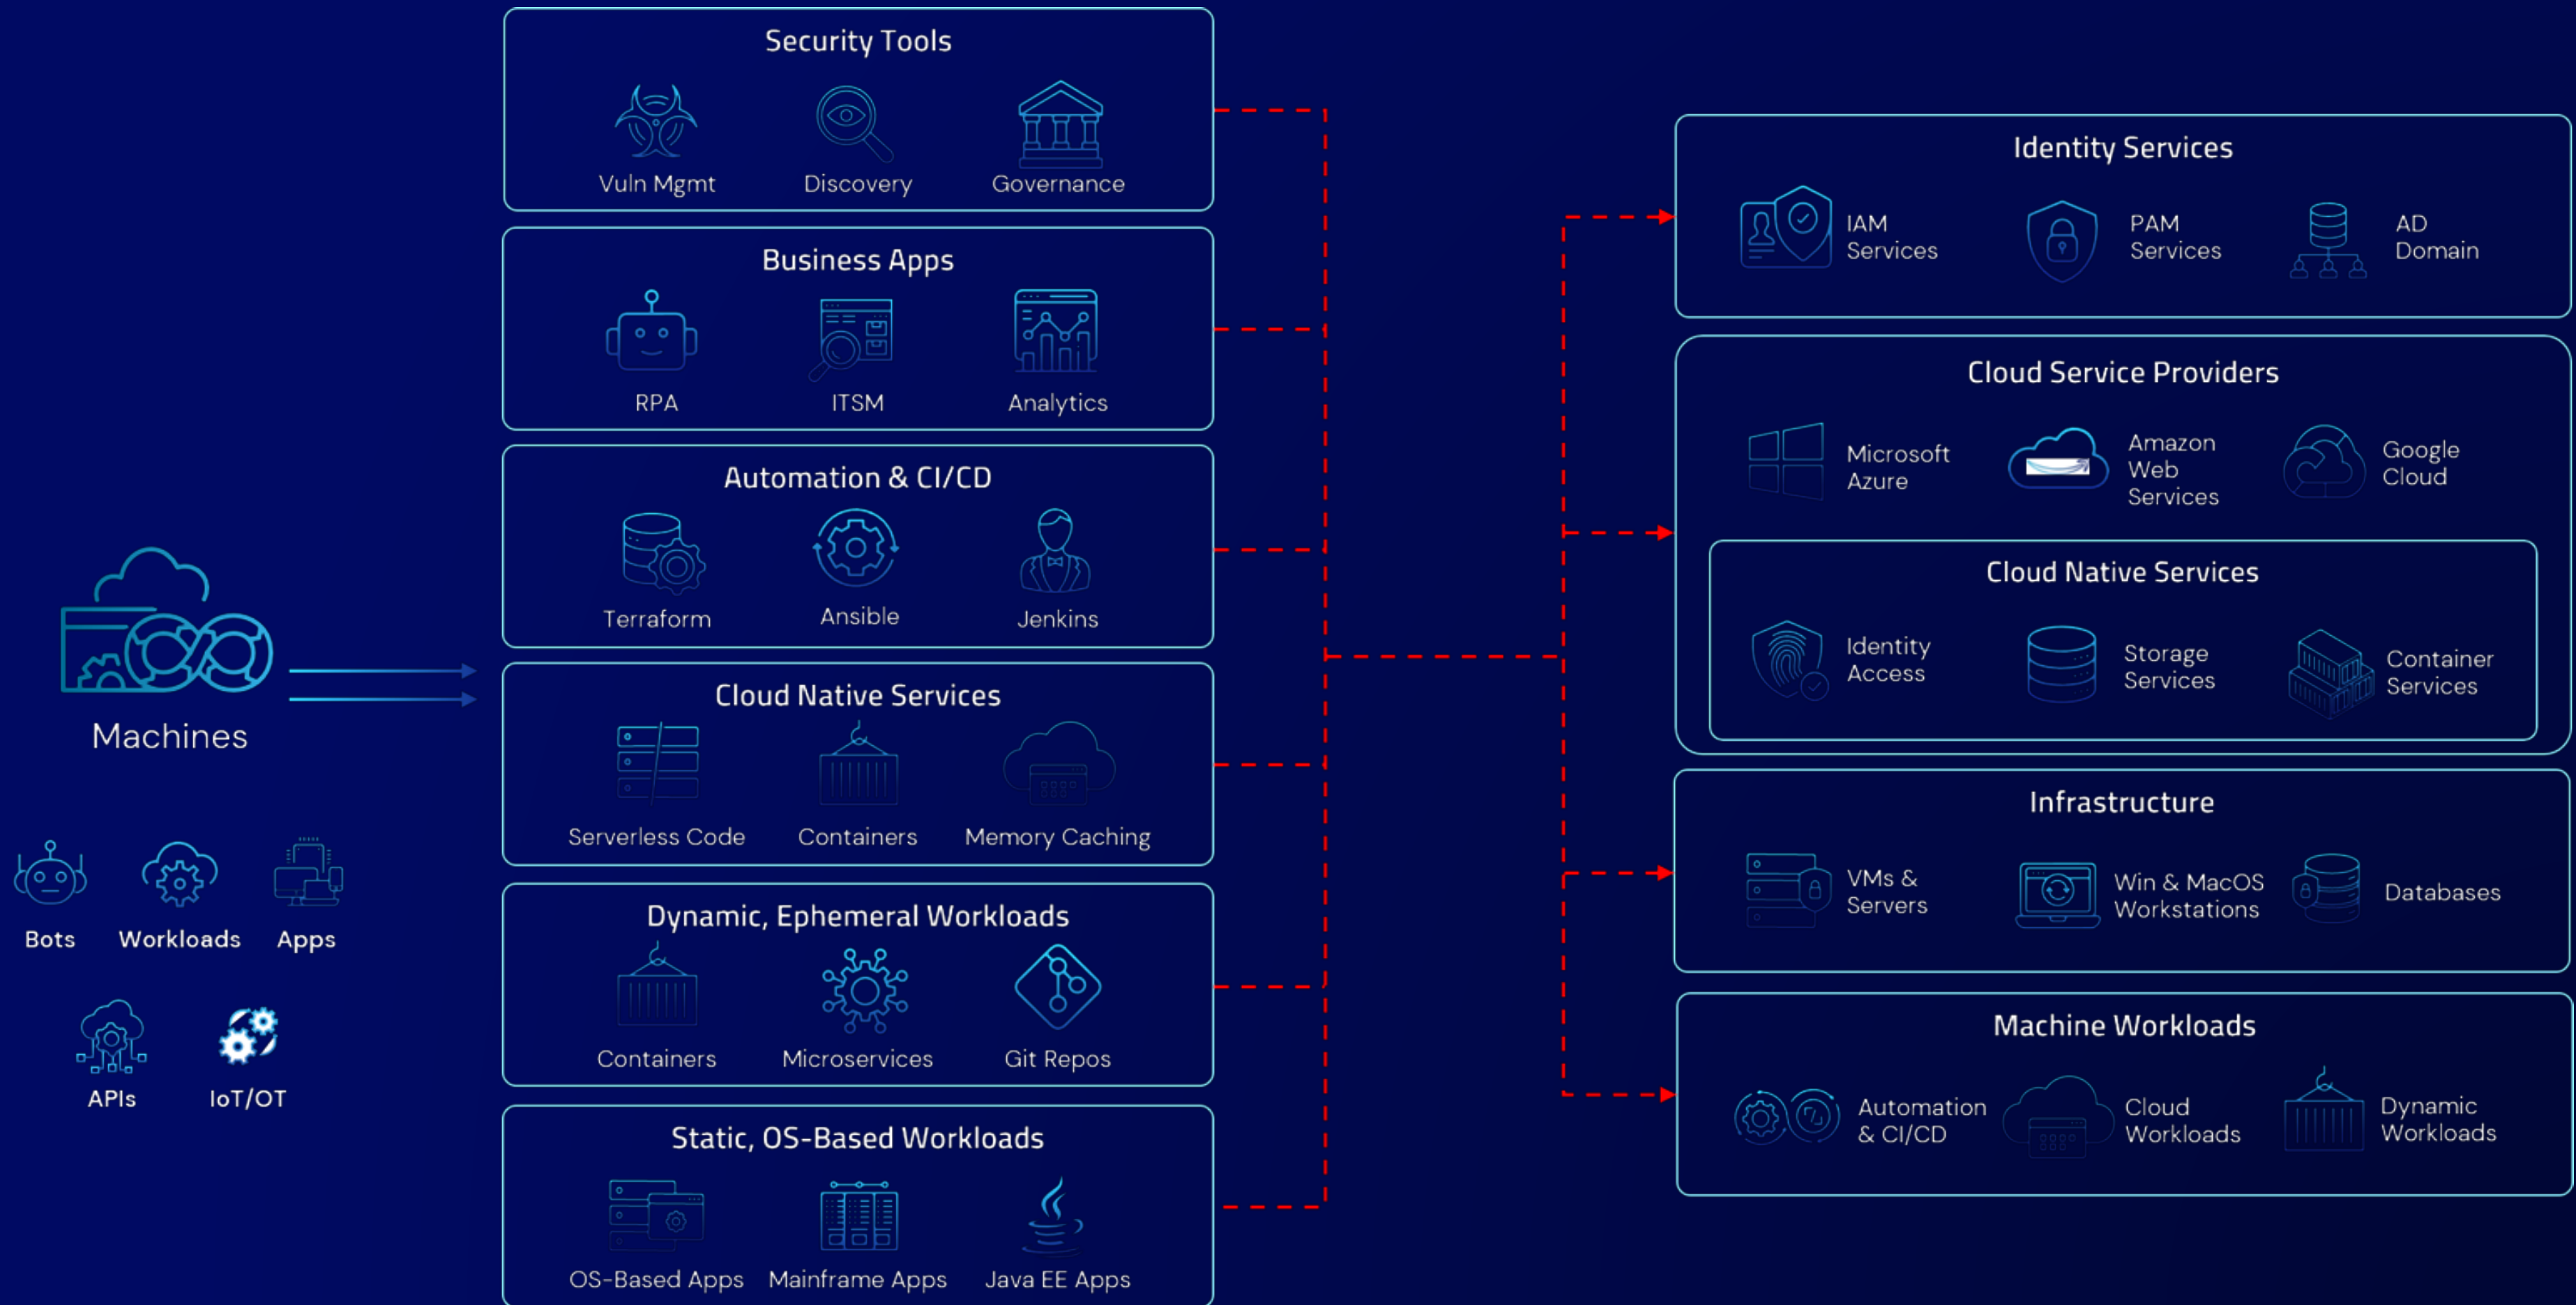

*How to Modernize Identity Security*

# From Privilege Sprawl to **Enforced** Least Privilege

## Continuous discovery, risk analysis, and enforcement of least privilege

# From Machine Proliferation to Secured From Inception

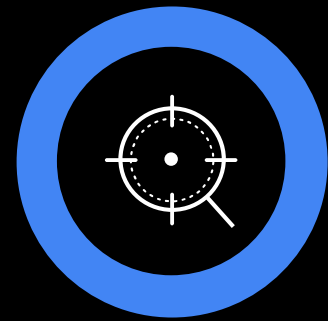

# Full Identity Security Strategy

# End-State: Identity Security

# Thank You
